Marine Exchange VTS VTIS Plot, 8.10.2002

NORCONTROLIT VTS5060
AOR - 9.7 x 4.7 Nm

Marine Exchange VTS: All areas - Operator

What Does AIS do?

- Broadcast and receive ship data between ships and shore stations
- Uses an autonomous organisation method for the VHF transmissions. (cellular concept)
- It provides real time tracking and identification of AIS equipped ships
Awareness of vessels behind islands or river bends
- Provides information for a VTS environment

What does AIS tell you?

Static

- MMSI number
- IMO Number
- Name of the ship
- Call sign
- Type of Ship
- Length and Beam
- Location of the GPS antenna

Dynamic

- Position (latitude/longitude)
- Heading
- Course and speed over ground
- Rate of turn
- Position accuracy
- Navigational status
- Time stamp

Voyage Related

- Ships draught
- Destination
- (Waypoints)
- (Number of persons on-board)
- Estimated time of arrival
- Voyage and static data are updated once every 6 minutes or on interrogation
- Type of Cargo

Tideland AIS

- AIMS S11 Base Station
- Installed November 2003
- Simple Installation
- Reception/Detection Solid to 40+ nm
- Frequent Reception/Detection to 120+ nm
- Message Feature Presently Unused

ADVANTAGES

- Second Detection Device
- Improved Benefit to USCG Functions
 - Safety
 - Security
- Better Customer Service
 - Tug, Linehandler Coordination
 - Service to Agents. Operators

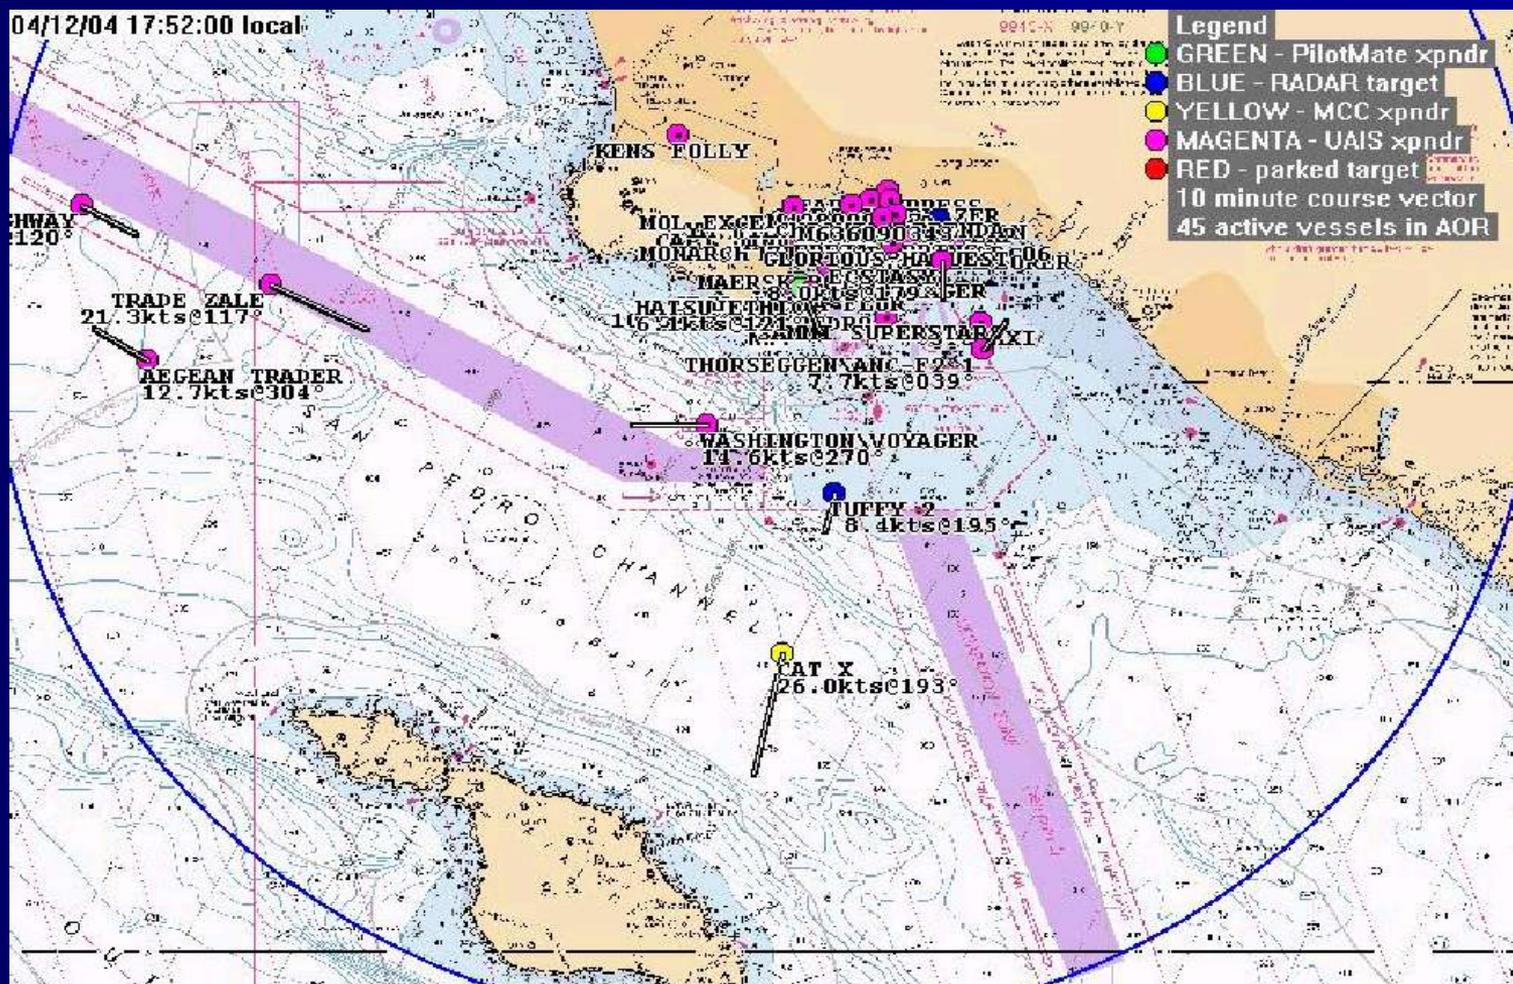

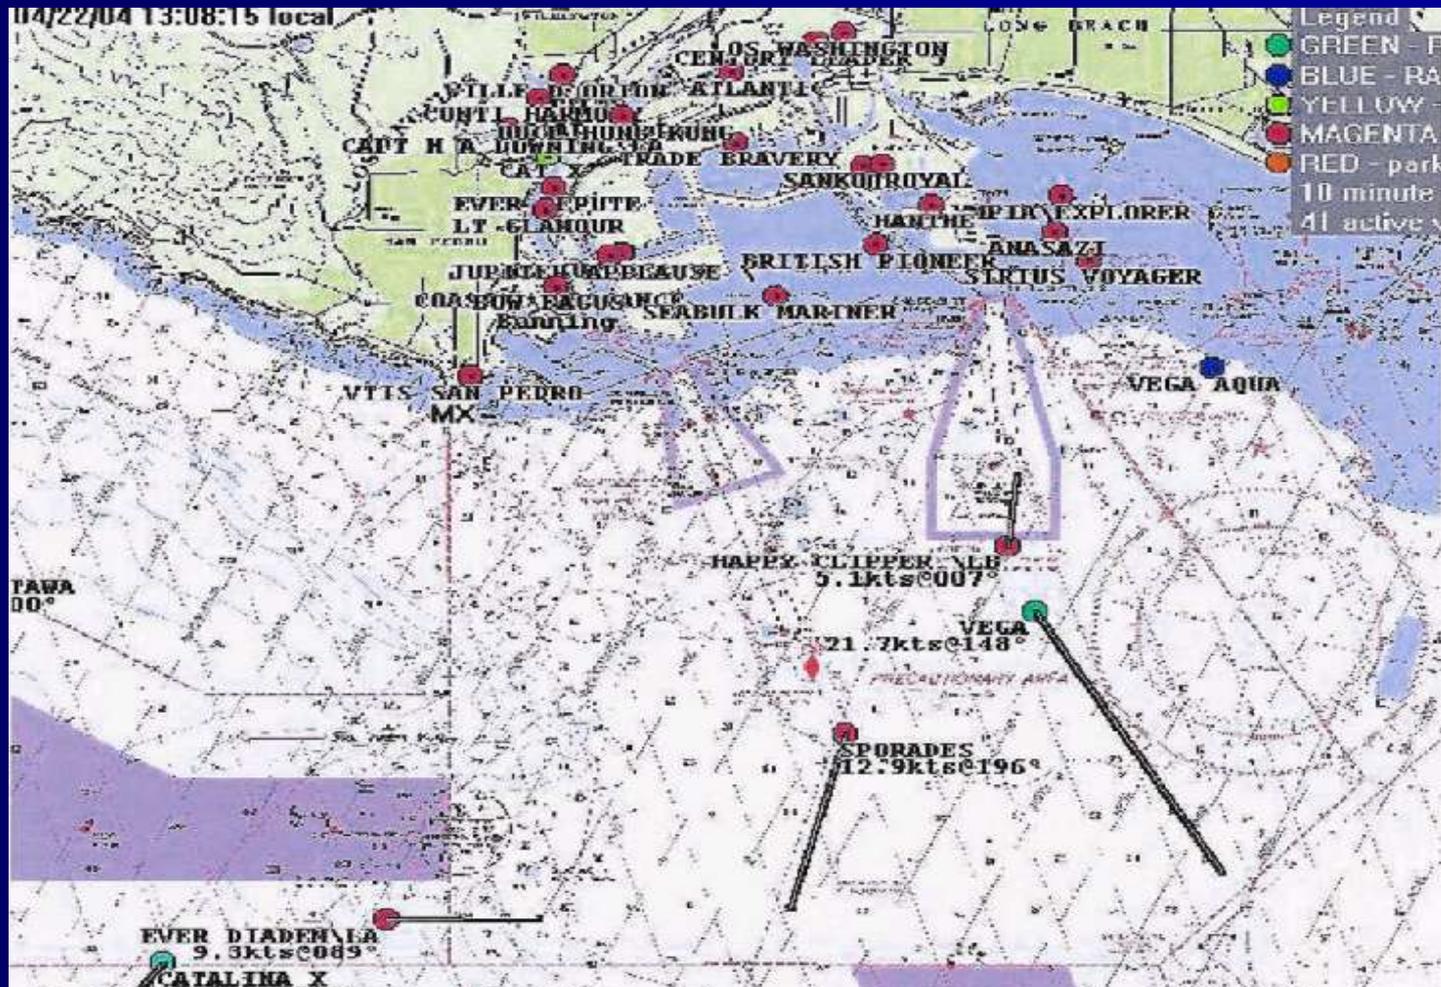

Target Mapping

- Supported By Norcontrol 5060 System/ARINC
- Real Time
- Website Based
- Improves Port Operations
- Improves Port Security

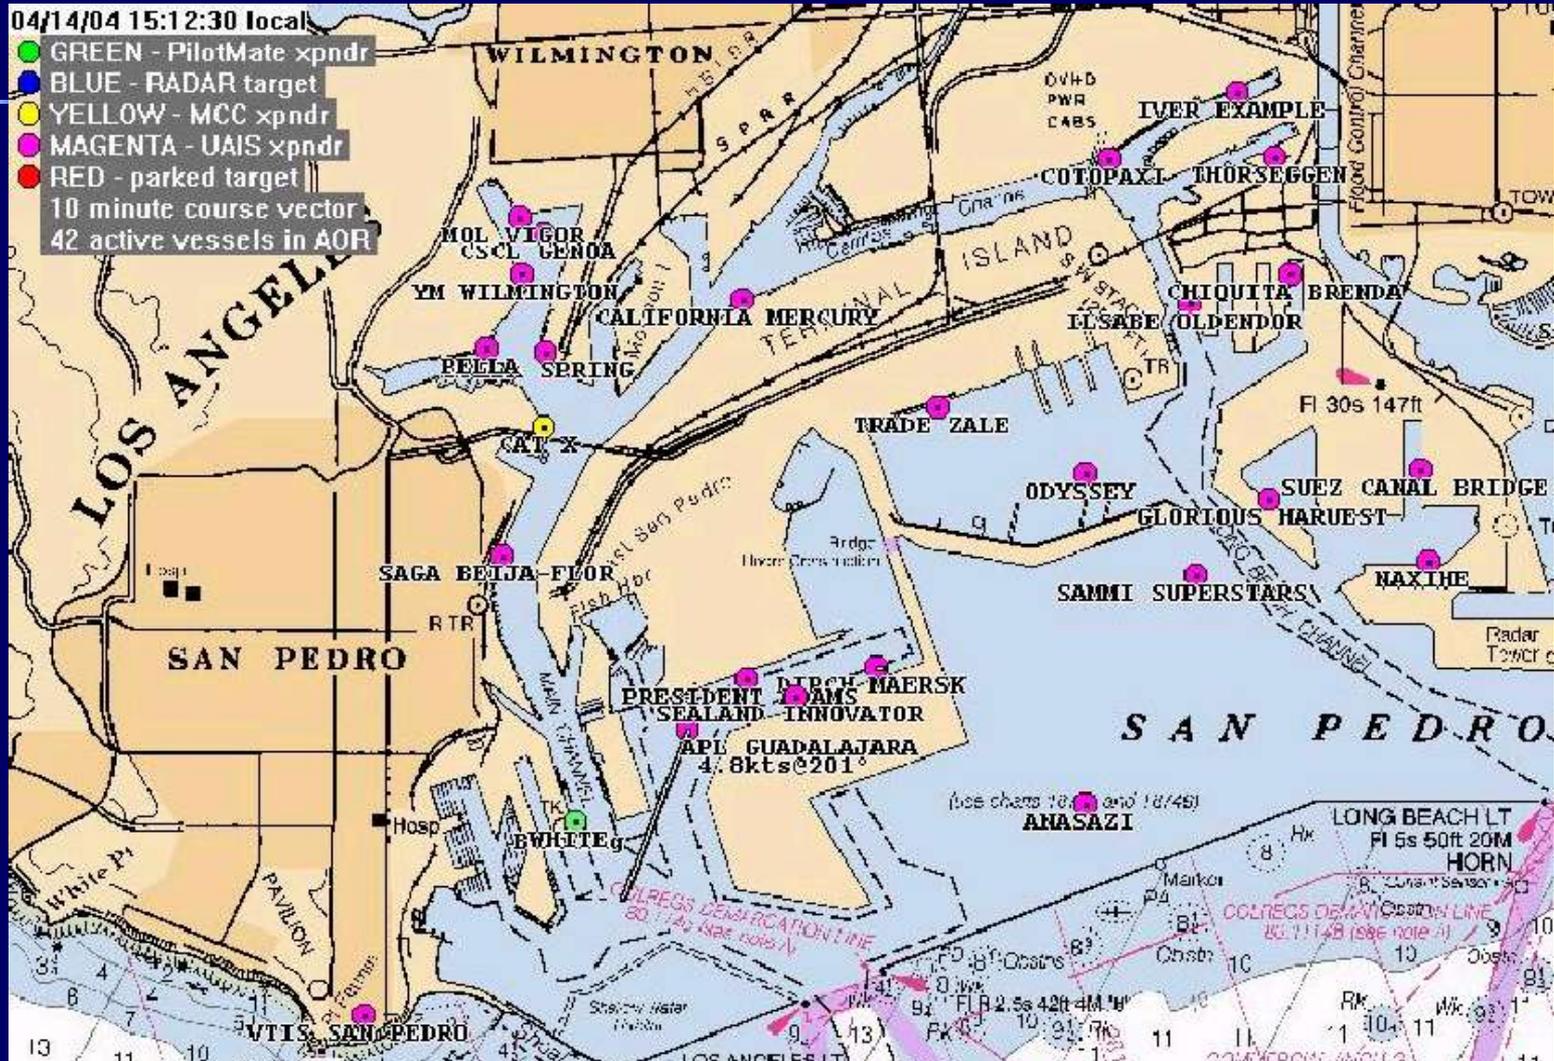

AOR

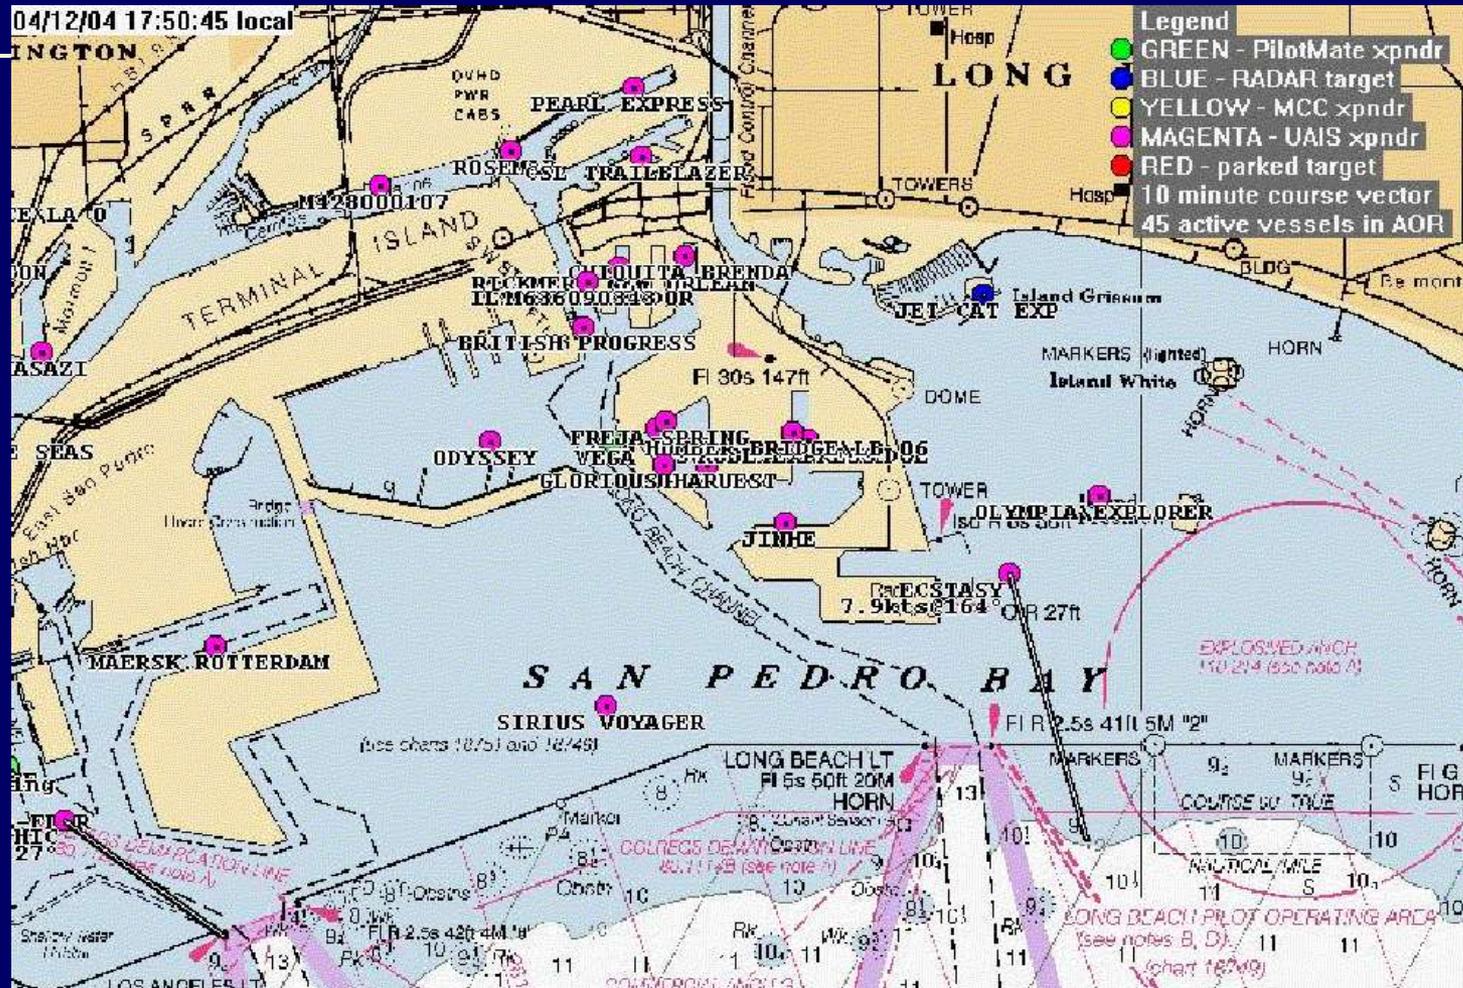

Precautionary Area

Los Angeles

Long Beach

CHALLENGES

- Resolution of USCG/Maritel Issue
- Innovative Utilization of Text Messaging
- Assimilation of "Class B" AIS Platforms
- Integration With Longer Range Tracking Devices

Going Forward

- ASVTS
- Real Time, World Wide
- MX Alaska Initiative
- MISNA Supported
- Trials On West Coast 2005

Automated Secure Vessel Tracking System (ASVTS)

*A Vessel Tracking System developed by the
Maritime Information Services of North America
that employs satellite and AIS transmissions as well as
other information sources to track the locations of
vessels to aid Maritime Security, Safety, Efficiency and
Environmental Protection*

MV EVER DAINTY
3/29/03-7/25/03

Automated Secure Vessel Tracking System™

Ability to determine where vessel has been before arriving in U.S.
